Re: Chemist I (Posting ID **J28816**)

**Dear Marinucci:**

Annie Khan mentioned a Chemist I opportunity that I am interested in applying for. I have close to 9 years of analytical laboratory experience in the pharmaceutical industry and my Master of Science in Chemistry, which makes me an ideal candidate for the Chemist I position.

My current experience with Molecular Insight Pharmaceuticals includes handling and testing radioactive raw materials and drug product. I am also responsible for inventory of all raw materials and Active Pharmaceutical Materials, which includes receiving, testing and re-testing materials in a timely manner. I have developed analytical methods for HPLC and GC analysis. I have used several types of analytical instruments (KF Coulometers, Spectrophotometers, GC, HPLC, LC-MS, refractometers, etc.), and performed many analytical techniques required for analysis. My experience has given me extensive knowledge in numerous chemicals, small molecules and proteins.

If you have questions, or if you want to schedule an interview, please contact me at [REDACTED]  
[REDACTED] I look forward to meeting you to further discuss employment opportunities with the Department of Public Health.

Sincerely,

**Demetrios Karapanos**
